

PONMATHI R

Entry-Level Software Engineer | Python | Java | Machine Learning
Hosur, Tamil Nadu, India | +91 8754394217 | pponmathil0@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Motivated Software and Machine Learning professional with a B.E. in Electronics and Communication Engineering. Possesses hands-on experience in Python, Java, NLP, and Data Analysis. Proven track record of developing real-world applications using Streamlit, automating data visualization, and building intelligent classification systems. Eager to leverage strong analytical skills and engineering background to contribute to dynamic software development teams.

TECHNICAL SKILLS

- **Languages:** Python, Java
- **Machine Learning & Data:** NLP, Scikit-learn, Pandas, NumPy, Data Visualization (Matplotlib)
- **Web Frameworks:** Streamlit
- **Tools:** Git, GitHub, VS Code
- **Core Concepts:** OOPs, Data Structures, Feature Engineering, Model Evaluation

EXPERIENCE

- Machine Learning Intern**
Vcodez Technologies, Chennai

October 2025 – January 2026
- Engineered and evaluated machine learning models for classification and prediction tasks, applying rigorous data preprocessing and feature engineering techniques.
 - Developed interactive web-based applications using Streamlit, creating intuitive user interfaces for model deployment.
 - Conducted Exploratory Data Analysis (EDA) on complex datasets to extract actionable business insights.
 - Implemented secure application workflows and utilized GitHub for version control and agile collaboration.
- Trainee**
Retech Solution Pvt. Ltd.

[Dates]
- Gained hands-on exposure to embedded systems, focusing on real-time signal processing using Raspberry Pi.
- Implant Trainee**
Ascent Solution Pvt. Ltd.

[Dates]
- Acquired practical experience in hardware workflows and the PCB production process.

KEY SOFTWARE PROJECTS

- Intelligent Resume Screening System (NLP & ML)** | *Python, Streamlit*
- Developed an automated screening system to rank candidates based on job descriptions.
 - Designed a dual-interface web application with distinct login modules for Recruiters and Candidates.
 - Implemented logic to provide job role recommendations and screening insights.
- Google Form Response Analyzer** | *Python, Pandas, Matplotlib*
- Built a data analysis tool to automate the processing of Google Form datasets.
 - Generated instant visualizations (Pie charts, Bar graphs) to provide quick reporting insights.
- Password Strength Detector** | *Python, Scikit-learn*
- Created a classification model to assess password complexity and predict strength levels.
 - Integrated logic to suggest security improvements, promoting cybersecurity best practices.

EMBEDDED SYSTEM PROJECTS

- **Intelligent Irrigation System:** Designed a system using soil moisture sensors to automate irrigation.
- **Smart Car (Arduino):** Prototyped an automated vehicle with connectivity features for safety.
- **Distance Meter:** Developed a precision measurement system utilizing ultrasonic sensors.

EDUCATION

- B.E. Electronics & Communication Engineering**
Panimalar Engineering College, Chennai
Class XII (HSC)
Sri Vijay Vidyalyaya Matric Higher Secondary School

2021 – 2025
CGPA: 8.1 (77%)
Score: 82.5%

INTERESTS

Cyber Security, Telehealth Technologies, Technical Writing, Reading Novels
